DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:
 - On page 4, line 17, a space should be placed between the words “of” and “timings”.
 - On page 5, line 28, “effecting” should be “effecting”.

Correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 7 recites the limitation "the predetermined commercially available music CD" in lines 26-27. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Applicant's Background of the Invention. On page 2, lines 1-10, applicant states, “In order to realize such a music-oriented game in a home-use game machine, generally, game music data and corresponding operation timing data are stored in a single CD-ROM, together with a game program, and the home-use game machine reads the game music data and corresponding

Art Unit: 3713

operation timing data from the CD-ROM. The home-use game machine then conducts reproduction of game music and displaying of guidance based on the data read.”

5. Claims 1-13 are rejected under 35 U.S.C. 102(a) as being anticipated by Sagawa et al.

Sagawa et al. (E.P. 903,169 A2) discloses a music action game machine comprising a main body; an operation input device disposed on a front side of the main body so as to be adjacent to hands of a player facing the front side of the main body, the operation input device having a plurality of operation members; a storage device for storing data of musical composition and data of a performance procedure associated with the musical composition; a music play device for playing the musical composition based on the data stored in the storage device; and operation instructing device for giving the player a visual instruction to operate the operation members in accordance with progress of a play of the musical composition based on the data stored in the storage device; an effect producing device for producing a performance effect in response to a performance operation performed by the player to each of the operation members; and estimation device for estimating the performance operation of the player based on a relationship between the performance procedure defined by the data stored in the storage device and the performance operation of the player; and an estimation informing device for informing the player of an estimation result determined by the estimation device. Therefore, the player can enjoy the simulation of the performance of the music through the operation of the operation members (Abstract).

Additionally, the storage device of the instant invention could be a magnetic storage device such as a hard disk drive or a floppy disk, an optical or a magneto-optical storage device such as a CD-ROM, a semiconductor storage device such as a RAM or a ROM, or the other

Art Unit: 3713

various types of storage devices (Column 9, lines 37-42). Each of these storage devices could also be accessed by a computer or game device via a network such as the Internet.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Suzuki et al '968, and Takai '908 disclose a dance game apparatus.
